

# GREENING

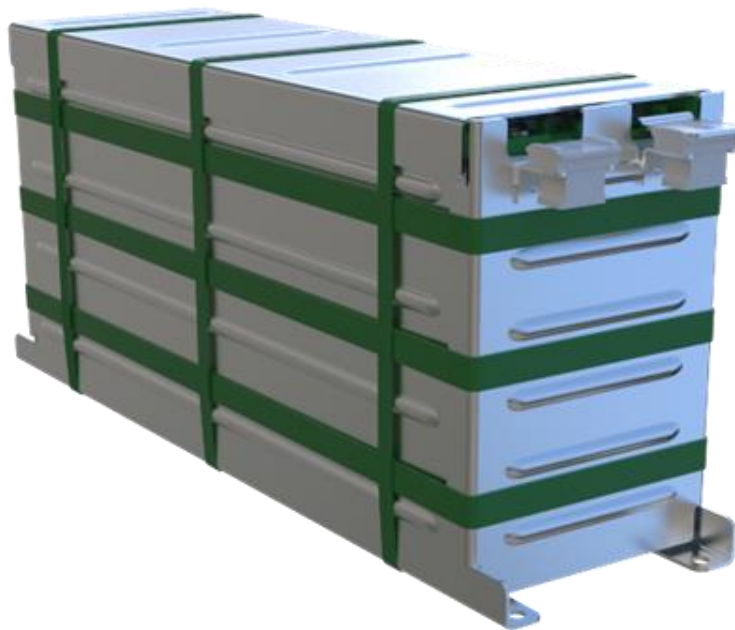

## GreenIngStandardBatteryModule (GSB) for your Application

### Performance

- Lithium iron phosphate battery (offers high thermal stability)
- Module voltage < 60 V (enables simplified service)

### Scalability

- Different cell dimensions (50 Ah / 105 Ah)
- From 12 to 16 cells
- System voltages up to 800 V

### Developed and Manufactured in Germany

- From prototypes to small series
- Flexible in-house production from modules to battery systems
